BSDCan 2014 Keynote

We Need a (more) Higher Quality FreeBSD

- A higher quality Releasee
- Buildable -CURRENT branch
- Reliable -STABLE branch
- Faster development

Test Early, Test Often

Integration Test is Important

We need to do it continuously.

Continuous Integration (CI)

Grady Booch, 1991

A software engineering practice of merging all developer working copies to a shared mainline several times a day

- To know conflicts earlier
- To know bugs earlier

CI Best Practices

- Maintain a code repository
- Automate the build
- Make the build self-testing
- Everyone commits to the baseline every day
- Every commit (to baseline) should be built
- Keep the build fast
- Test in a clone of the production environment
- Make it easy to get the latest deliverables
- Everyone can see the results of the latest build
- Automate deployment

We Do This from Beginning

- Maintain a code repository ✓ (svn.FreeBSD.org)
- Automate the build
- Make the build self-testing
- Everyone commits to the baseline every day
- Every commit (to baseline) should be built
- Keep the build fast
- Test in a clone of the production environment
- Make it easy to get the latest deliverables
- Everyone can see the results of the latest build
- Automate deployment

We are an Open Source OS Project

- Maintain a code repository ✓ (svn.FreeBSD.org)
- Automate the build
- Make the build self-testing
- ~~● Everyone commits to the baseline every day~~
- Every commit (to baseline) should be built
- Keep the build fast
- ~~● Test in a clone of the production environment~~
- Make it easy to get the latest deliverables
- Everyone can see the results of the latest build
- ~~● Automate deployment~~

What We Need

- Automate the build
- Make the build self-testing
- Every commit (to baseline) should be built
- Keep the build fast
- Make it easy to get the latest deliverables
- Everyone can see the results of the latest build

How We Do

A good CI system provides:

- Automate the build
- Make the build self-testing
- Make it easy to get the latest deliverables
- Everyone can see the results of the latest build

Needs help from everyone:

- Every commit (to baseline) should be built
- Keep the build fast

Automatic Build & Some History

2002~2014, Tinderbox

- By Dag-Erling Smørgrav <des@FreeBSD.org>
- <http://tinderbox.freebsd.org>
 - Probably started in March 2002
 - Probably stopped in September or October 2014
- Open Sourced
 - <svn://svn.freebsd.org/base/user/des/tinderbox>
- Well Documented
 - <https://www.freebsd.org/doc/en/books/developers-handbook/testing-tinderbox.html>
 - <https://wiki.freebsd.org/Tinderbox>

tinderbox.freebsd.org

2013, jenkins-admin@FreeBSD.org

- Founded by Craig Rodrigues in late 2013
 - Current Members:
 - Ahmed Kamal, Baptiste Daroussin (bapt@), Craig Rodrigues (rodrigg@), Li-Wen Hsu (lw@), Steve Wills (swills@)
 - <https://www.freebsd.org/administration.html#t-jenkins-admin>
 - Alumni:
 - Julio Merino (jmmv@), Steven Kreuzer (skreuzer@), R. Tyler Croy
- First working group was in BSDCan 2014
- Discussions continued in following conferences
- Second working group was in EuroBSDCon 2016
- Third working group was in AsiaBSDCon 2017 (yesterday!)
- More information: <https://wiki.FreeBSD.org/Jenkins{/TODO}>

Jenkins

- An open source automation server written in Java
- Created by Kohsuke Kawaguchi
- <https://jenkins.io>
- Helps automating the non-human part of the whole software development process
 - Continuous Integration
 - Continuous delivery
- Extended by various of plugins

Jenkins

2013, <https://Jenkins.FreeBSD.org>

- Created and operated by jenkins-admin@ since the group formed
- Independent successor of tinderbox.FreeBSD.org
- Periodically builds and tests FreeBSD src and doc trees
 - Branches: head, stable-11, stable-10, stable-9
 - Architectures: amd64, i386, sparc64
 - Others: build with GCC
 - Leverage the cross toolchain
 - amd64 cross build amd64 itself :)
- Repository: <https://github.com/freebsd/freebsd-ci>

https://Jenkins.FreeBSD.org

2016, <https://CI.FreeBSD.org>

- Started in summer 2016
- Also based on Jenkins
- Experiment for some new ideas and features
- Artifact server introduced
 - Pass artifact between stages in a pipeline
 - Open to the public for doing more tests
- Job template
 - Make it easier to add new CI jobs without knowing jenkins configuration
- Codes are currently in my fork repository, will merge back in the future
 - <https://github.com/lwhsu/jjb-freebsd-ci> (Jenkins configuration)
 - <https://github.com/lwhsu/freebsd-ci> (everything else)

head-amd64-* Jobs on CI.FreeBSD.org

Automatic Build on <https://CI.FreeBSD.org>

- *-build jobs
 - `scripts/build/build-world-kernel.sh`
 - Generalized for different versions and architectures
 - `make buildworld & buildkernel`
 - Build distribution files
- *-LINT jobs
 - `scripts/build/build-kernel-LINT.sh`
 - Build LINT kernel

Self Tests

Kyua

- Testing framework for infrastructure software
- By Julio Merino <jmmv@{NetBSD,FreeBSD}.org>
- Repository
 - <https://github.com/jmmv/kyua>
- Documentation
 - <https://github.com/jmmv/kyua/wiki/Quickstart>
 - Julio's talk & tutorial at AsiaBSDCon 2014
 - <https://drive.google.com/drive/folders/0B08g-X1kPkSYNmlEdTB5RjIFbkk>

bhyve - The BSD Hypervisor

- <http://bhyve.org/>
- Built in FreeBSD since 10.0
- On ci.FreeBSD.org
 - *-images jobs build virtual machine images installed by distribution files
 - *-testvm jobs build virtual machine with kyua installed
 - Basically the same with above job, but virtual disk size is smaller
- *-test jobs take testvm image from artifact server and run it
 - For RISC-V architecture we use QEMU

Putting Them Together

- Create virtual machine image
 - Pre-install kyua package and test files
 - Customize /etc/rc.local script
 - Run tests
 - Generate reports
 - Shutdown virtual machine
 - scripts/build/build-test_image.sh
- Run tests in virtual machine
 - Fetch the vm image, boot it
 - Wait for it completes running tests, or kill it when timeout
 - Extract test reports from the vm image
 - scripts/test/run-tests.sh

Access to Results

JUnit Format Output

```
<testcase classname="bin.cat.cat_test" name="align" time="0.018">
<system-out>Executing command [ /bin/sh -c cat -be /usr/tests/bin/cat/d_align.in ]
</system-out>
<system-err>Test case metadata
-----

Artifacts

- *.txz
 - From *-build jobs
 - Distribution files just like what on <https://download.FreeBSD.org>
- disk.img.xz
 - From *-images jobs
 - Virtual machine disk image file, installed from above *.txz files
- disk-test.img.xz
 - From *-testvm jobs
 - Virtual machine disk image file, with test script and test case

artifact.ci.FreeBSD.org

- [ftpes://artifact.ci.FreeBSD.org](ftp://artifact.ci.FreeBSD.org)
 - Serves files upload from jobs
 - Through Jenkins "Publish Over FTP" Plugin
 - Add FTP over TLS support
- <https://artifact.ci.FreeBSD.org>
 - Serves files download for downstream jobs in pipeline or external users
 - snapshots/
 - `<branch>/<svn_revision>/<target>/<target_arch>`
 - `head/r303226/amd64/amd64`

Open Configurations

Jenkins Job Builder

- By OpenStack project
 - <http://docs.openstack.org/infra/jenkins-job-builder/>
- Before that, Jenkins job can only be edited on web interface
- Jenkins Job Builder provides YAML -> Jenkins configurations
- Create / update job through Jenkins' web service
- Make jenkins configurations trackable and reproducible
- <https://github.com/lwhsu/jjb-freebsd-ci>

Make Creating New Job Easier

- Not everyone knows (and has to know) how to configure Jenkins
- Most of the build jobs just have different build scripts
- Create a "job template"
 - Environment setup
 - Check out latest source code
 - Setup needed version of FreeBSD
 - Install required packages
 - Execute specified build script for that job
 - Environment cleanup

Job Definition

- job:
 - name: FreeBSD-head-scan_build
 - scm:
 - FreeBSD-src-head
 - builders:
 - checkout-scripts
 - setup-jail
 - **execute-in-jail**
 - publishers:
 - clean-jail
 - wrappers:
 - timestamps

Build-in-jail Script Sets

- <https://github.com/lwhsu/freebsd-ci/tree/jjb/scripts/jail>
- Simplify clean environment setup and job execution
 - Three phase: setup.sh, execute.sh, clean.sh
 - sudo installed by default
- A typical job configuration
 - build.sh
 - Main build script, which is executed by execue.sh in the jail
 - jail.conf
 - Jail environment configuration: version, arch, etc.
 - pkg-list
 - Package needs to be installed (from pkg.FreeBSD.org)

Adding a New Job

- Submitters bring their own build scripts and confs:
 - jail.conf, pkg-list, build.sh
 - Other configurations (ex: src.conf, make.conf)
- Jenkins-admin merges scripts to freebsd-ci/jobs/<job name>/
- Jenkins-admin creates a new entry jenkins job builder, push it
- Done! Our restless Jenkins executes it around the clock

Example: FreeBSD-head-aarch64-build

- jail.conf

```
TARGET=amd64
TARGET_ARCH=amd64
WITH_32BIT=0
OSRELEASE=11.0-RELEASE
```

- pkg-list

```
aarch64-binutils
```

- build.sh

```
#!/bin/sh
env \
    JFLAG=${BUILDER_JFLAG} \
    TARGET=arm64 \
    TARGET_ARCH=aarch64 \
    sh -x freebsd-ci/scripts/build/build-world-kernel.sh
```

Quarantine Mode

- Used to build with patch from external
- `QUARANTINE=1` in `jail.conf`
- Using jail to create an isolated environment
 - Remove internet connection after required packages installed
- Limitation job resource from jenkins job setup

- Limit execution time

wrappers:

- `timeout:`

`timeout: 90`

`fail: true`

`type: absolute`

Other Integrations

Notifications

- When to notify
 - Build failed
 - Build unstable (compile successfully, but some test cases failed)
 - Build back to stable
- How to notify
 - Email
 - IRC
- What to notify
 - Changes since last build (who & what)
 - Tail of the console output
 - What are the test cases failed

Email Notification

- Double-edged sword
- If nobody reads, it's totally no use
- Email-ext plugin

Reduce False Alert

- Be more careful before sending
- Pre-send script
 - <https://github.com/freebsd/freebsd-ci/blob/master/scripts/email-ext/pre-send.groovy>
 - Filter out the internal errors of the jenkins cluster

Notification Contents

- Use email-ext plugin to customize mail body

Template for Failed/Unstable Build Jobs

`$PROJECT_NAME - Build #${BUILD_NUMBER} - ${BUILD_STATUS}:`

`Build information: ${BUILD_URL}`
`Full change log: ${BUILD_URL}changes`
`Full build log: ${BUILD_URL}console`

`Change summaries:`

`${CHANGES, format="%r by %a:\\n%m\\n"}`

`The end of the build log:`

`${BUILD_LOG}`

Example: Build Failed Mail

FreeBSD_HEAD_i386 - Build #3987 - Failure:

Build information: https://jenkins.FreeBSD.org/job/FreeBSD_HEAD_i386/3987/

Full build log: https://jenkins.FreeBSD.org/job/FreeBSD_HEAD_i386/3987/console

Change summaries:

306148 by jpaetzel:
Update oce driver to 11.0.50.0

Submitted by: Venkat Duvvuru <venkatkumar.duvvuru@broadcom.com>

The end of the build log:

[...truncated 190386 lines...]

```
--- oce_if.o ---
/usr/src/sys/modules/oce/../../dev/oce/oce_if.c:45:10: fatal error: 'oce_user.h' file not found
#include "oce_user.h"
      ^
1 error generated.
*** [oce_if.o] Error code 1

bmake[4]: stopped in /usr/src/sys/modules/oce
```

Template for Failed/Unstable Test Jobs

`$PROJECT_NAME - Build #${BUILD_NUMBER} - ${BUILD_STATUS}:`

`Build information: ${BUILD_URL}`
`Full change log: ${BUILD_URL}changes`
`Full build log: ${BUILD_URL}console`

`Change summaries:`

`${CHANGES, format="%r by %a:\\n%m\\n"}`

`The failed test cases:`

`${FAILED_TESTS, showStack="false", showMessage="true", maxTests=100}`

Example: Test Failed Mail

FreeBSD_HEAD-tests - Build #1746 - Still Unstable:

Build information: https://jenkins.FreeBSD.org/job/FreeBSD_HEAD-tests/1746/
Full change log: https://jenkins.FreeBSD.org/job/FreeBSD_HEAD-tests/1746/changes
Full build log: https://jenkins.FreeBSD.org/job/FreeBSD_HEAD-tests/1746/console

Change summaries:

No changes

The failed test cases:

2 tests failed.

FAILED: sys.mqueue.mqueue_test.mqtest3

Error Message:

atf-check failed; see the output of the test for details

FAILED: sys.mqueue.mqueue_test.mqtest4

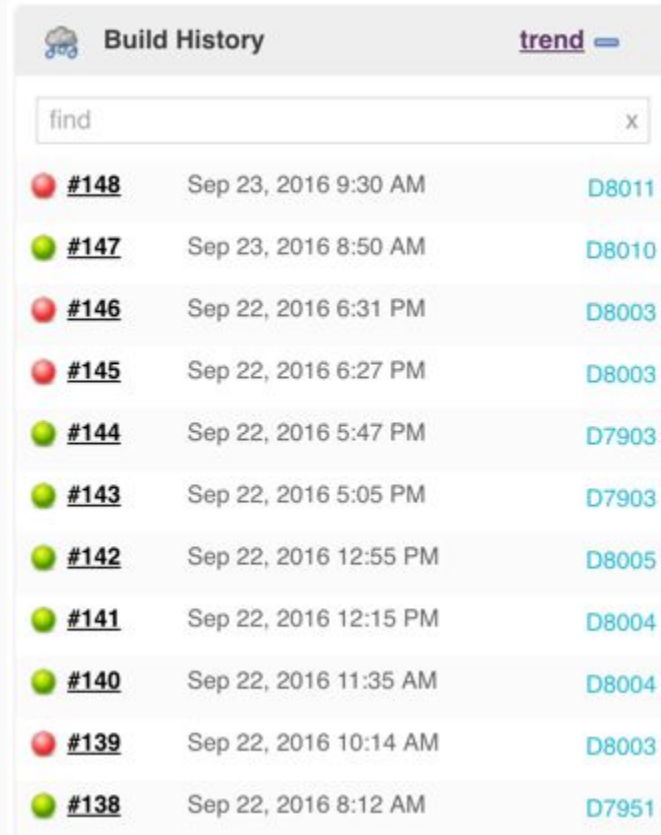

Error Message:

atf-check failed; see the output of the test for details

Integration with Code Review System

- Phabricator Differential Plugin
 - From Uber
 - <https://github.com/uber/phabricator-jenkins-plugin>
 - Good readme.md, just follow it
 - Supports only git (for now, patch for svn is preparing)
 - <https://github.com/lwhsu/phabricator-jenkins-plugin/tree/scm>
 - Basically provide option to select the main SCM
 - Conditionally issue SCM-specified options to arc

Patch Number Attached to each Build

 **Build History** trend

Clang scan-build bug report for build #4

Group	Type	File	Path Length	Description	
Security	Potential insecure memory buffer bounds restriction in call 'strcpy'	/workspace/src/usr.sbin/ctm/ctm_rmail/ctm_rmail.c	1	Call to function 'strcpy' is insecure as it does not provide bounding of the memory buffer. Replace unbounded copy functions with analogous functions that support length arguments such as 'strncpy'. CWE-119	Details
Dead store	Dead assignment	/workspace/src/sys/modules/sym/./././dev/sym/sym_hipd.c	1	Value stored to 'f1' is never read	Details
Dead store	Dead assignment	/workspace/src/sys/modules/sound/sound/./././dev/sound/pcm/mixer.c	1	Value stored to 'ret' is never read	Details
Security	Potential insecure memory buffer bounds restriction in call 'strcpy'	/workspace/src/usr.bin/less/./././contrib/less/filename.c	1	Call to function 'strcpy' is insecure as it does not provide bounding of the memory buffer. Replace unbounded copy functions with analogous functions that support length arguments such as 'strncpy'. CWE-119	Details
Logic error	Dereference of null pointer	/workspace/src/lib/ncurses/panelw/././././contrib/ncurses/panel/p_bottom.c	4	Access to field '_begy' results in a dereference of a null pointer (loaded from field 'win')	Details
Dead store	Dead assignment	/workspace/src/sys/modules/drm/radeon/././././dev/drm/r600_cp.c	1	Value stored to 'num_backends' is never read	Details

Detailed HTML Output

```
697      /*
698       * Recheck that "." entry in the vdp directory points
699       * to the inode we looked up before vdp lock was
700       * dropped.
701       */
702      error = ufs_lookup_ino(pdp, NULL, cnp, &ino1);
703      if (error) {
704          43 ← Assuming 'error' is 0 →
705          44 ← Taking false branch →
706              vput(tdp);
707              return (error);
708          }
709          if (ino1 != ino) {
710              45 ← Taking false branch →
711              vput(tdp);
712              goto restart;
713          }
714          *vpp = tdp;
715          46 ← Dereference of null pointer (loaded from variable 'vpp')
```

Igor + Checkstyle

- textproc/igor
 - By Warren Block <wblock@FreeBSD.org>
 - Automated proofreader for text files, man pages, and DocBook SGML source files

- Checkstyle
 - A tool to help programmers write Java code that adheres to a coding standard
 - Output an XML can be parsed by Jenkins Checkstyle Plugin

We added a new option (-X) to igor to output checkstyle XML

Build Status Badge

- <https://wiki.freebsd.org/arm64>:

- <https://<job url>/badge/icon>
- <https://<job url>/lastCompletedBuild/badge/icon>

Other Jenkins Plugins Used

- **SCM Sync configuration**
 - Use post-commit hook to notify administrators
- **SafeRestart**
 - Schedule restart jenkins when all current jobs complete
 - Save and resume the build queue
- **Green balls**
 - People like green
 - Everything is fine

Epilogue

Summary

- Continuous Integration does help development of the FreeBSD project
- Hope these experience and codes can also help downstream projects

Future Work

- Have you to work on testing FreeBSD!
- Check for reproducible build
- More tests, even some are not enabled by default
 - Dtrace
- Build for project branches
 - Make testing feature branches easier
- CI for ports
 - Collaboration with "redports"
 - Automatically "exp-run"
- Performance tests
- Work with other projects
