“
Driver is not found or not configured.
The device is supported by FreeBSD versions [13.0 and newer](#).
You are probably need to configure system for the device to work properly (modify kernel config, install firmware, etc.).

[Vincent Milum Jr](#) 2021-09-16 23:11:07 UTC

[Description](#) [\[reply\]](#) [\[-\]](#)

vm_guest is never set on Aarch64, tested on ESXi ARM Fling

```
sysctl kern.vm_guest  
kern.vm_guest: none
```

On AMD64 using ESXi, we have

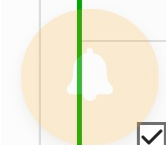

```
sysctl kern.vm_guest  
kern.vm_guest: vmware
```

Comparing these two files, there is no reference to vm_guest on Aarch64

The FreeBSD Project

FreeBSD is an open source operating system used to power servers, desktops and embedded devices. It has been developed for more than thirty years. Its architecture, networking, security and storage features make FreeBSD the platform of choice for many of the world's most important sites and most performance-critical embedded network storage devices.
